- **Summary**
→ I am a front-end developer with expertise in HTML, CSS, and JavaScript. And also doing graphic designing. specialize in creating, dynamic websites and have a strong focus on smooth animations to enhance user experience

Technical Skill

- **Language** → Html , CSS , Javascript

- **Libraries** → Tailwind CSS , React , Next Js

- **WebDev Tools** → Wordpress, Bootstrap , VS code, Cursor, Chrome DevTools, GitHub, Vercel

- **Graphic Designing** → Figma , Photoshop, Illustrator , Adobe XD

Work Experience

- **Media Computer Academy** (↗)
  → Successfully designed and developed the 'Media Computer Academy' website as a freelance project, utilizing WordPress alongside custom coding to create a responsive and user-friendly interface. This experience honed my skills in web development, project management, and client communication.

Personal Projects

- **Significo** (↗)
  → I created a website called Significo using **HTML**, **CSS**, **JavaScript**, and **GSAP**. It features **smooth scroll animations** and vibrant color transitions, with the website's color scheme changing dynamically after each page, providing an engaging user experience.

- **Add to Cart** (↗)
  → I developed a project called Cart Box using HTML, CSS, and JavaScript. It features a dynamic cart system where, upon clicking the 'Add to Cart' button, items are added to the cart, and the total price updates automatically

- **Spotify-Clone** (↗)
  → I developed website named Spotify-Clone using **React** and **Framer Motion**. By integrating modern web technologies, spotify-clone offers both dynamic interactions and fluid motion effects, enhancing the overall visual appeal and interactivity
